## Skill Development Project on Information Technology

### OBJECTIVES

The project 'Skill Development Project on Information Technology' was designed to improve youth employability through soft skills acquisition using information technology, & management sciences. To impart workplace-based training to 160 trainees (80 men and 80 women) jointly with the partnering enterprises, the project carried out training activities for 26-months. The training intervention enabled enrolled trainees to learn technical skills leading to employment in the information technology and graphic designing related occupations.

### INTRODUCTION

The TVET Sector Support Programme promotes an active partnership between technical education and vocational training (TVET) institutes and private sector for imparting industry demand-driven training. The workplace-based training approach provides trained human resource to the employers according to their need, thus, increasing the chances of employments of graduates. The involved enterprises and business industry associations are engaged in selecting relevant qualifications, planning and delivering training, and conducting assessments within the national qualification framework of Pakistan.

The Programme provides technical support to training institutes and enterprises to link theoretical with practical training at the workplace. In this regard, both sides can agree on flexible approaches in training delivery, which meet the demands of the involved enterprises.
